

DEADLY EXPOSURE PROTECTION

SENTRY SHIELD® LAW ENFORCEMENT DEFENSE PERSONAL PROTECTION KITS

Job hazards for law enforcement professionals are impacting the safety and health of those we trust to protect our communities. Unknown powdered substances should be treated with extreme caution. Exposure to a small amount of certain substances, like fentanyl, can lead to significant health-related complications, respiratory depression, or death.

IS YOUR DEPARTMENT PREPARED FOR WHAT IT MAY ENCOUNTER IN THE FIELD TODAY?

DQE's Sentry Shield line of PPE kits provide protection from unknown powder substances that could be hazardous like fentanyl, carfentanil, or other powerful opioid-based substances. These personal protection kits range in coverage and are based on the severity of exposure levels that responders may encounter.
